

## ABSTRACT OF THE DISCLOSURE

The present invention discloses a computer desk, comprising: two vertical rods; at least one optical disk rack, being installed onto one of the vertical rods, and the optical disk rack  
5 having an external arc panel, and several optical disk slots horizontally disposed on the external arc panel; a rear rod being fixed onto the rear side of the external arc panel at the position corresponding to the area of the optical disk slots; a plurality of frames being fixed between two vertical rods and having an object  
10 placing board installed on each frame to define the structure of an object placing rack, a main object placing rack, and a main desk board; and one of the vertical rods at its bottom having a main system retainer.
